

Electronic Health Information (EHI) Export

File Formats These are standardized computable formats. The export (s) will include one or more of the formats below depending on set-up and use of the system by the agency.

Single Patient:

- **CCD/C-CDA documents**
Consolidated Clinical Document Architecture which will contain data required by the USCDI v1 standards.
- **JSON**
JavaScript Object Notation. JSON is a lightweight format for storing and transporting data. JSON is in plain text, which is readable by a person, but is meant to be parsed and understood by an application or web page.
- **PDF documents**
Portable Document Format, is a file format to present documents, including text formatting and image.

Patient Population:

- **.bak file**
This is a full MSSQL Server database backup of all data for an agency that can be restored.
